# Example Talk Title

## Conference Name 2025

Kshitij Duraphe

2025-01-18

## Introduction

This is an example presentation with dual output:

- **RevealJS** → HTML slides for the web
- **Typst** → PDF download

## Mathematics

Both formats support LaTeX math:

$$E = mc^2$$

And inline math like $\alpha + \beta = \gamma$.

## Code Example

```
def hello_world():
    print("Hello, World!")
```

## Images

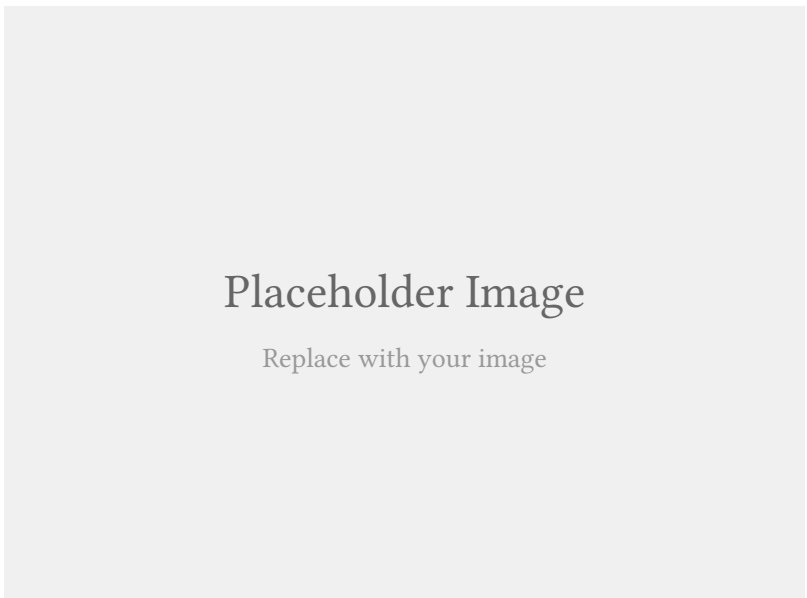

Figure 1: Placeholder image

Add images to the `images/` subdirectory and reference them.

## Two Columns

Left column content

Right column content

## Questions?

Thank you for attending!
